

PEAK PERFORMANCE

**STARTS AT
THE DOCK**

YOUR DOCK SETS THE PACE FOR EVERYTHING ELSE

Your dock is where operations begin and end—it's the critical link between your facility and your customers. When it's running well, product moves, deadlines are met and your team works safely. When it's not, everything downstream feels it.

Common dock and door challenges that impact operations:

Productivity Loss

Energy Waste

Safety Risks

Security Gaps

- At Raymond Storage Concepts (RSC), we understand that no two operations are the same. That's why we offer tailored dock and door solutions designed around your facility, your workflow and your goals.

Eliminate Bottlenecks at the Dock

The right equipment is the difference between a dock that holds you back and one that keeps you moving. We'll help you identify the right products to streamline loading and unloading, optimize your existing space and keep product moving on time.

Keep Your People Safe

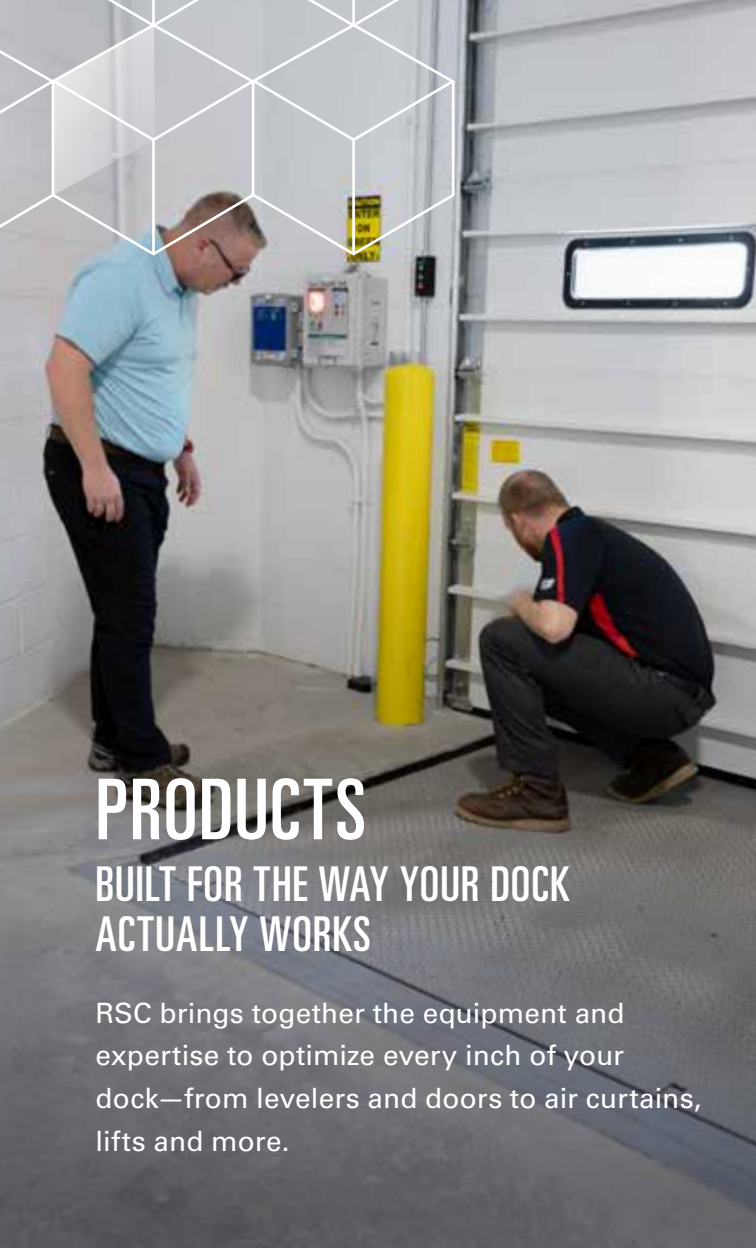

A secure dock environment isn't optional—it's foundational. Well-maintained dock and door solutions reduce the risk of accidents, minimize equipment malfunctions and create a safer workspace for the people who depend on it every day.

Reduce Costs

Preventative maintenance extends equipment life and reduces costly emergency repairs. Our door seal and shelter options help lower energy consumption and utility bills. Protecting your equipment means protecting your bottom line.

PRODUCTS

BUILT FOR THE WAY YOUR DOCK ACTUALLY WORKS

RSC brings together the equipment and expertise to optimize every inch of your dock—from levelers and doors to air curtains, lifts and more.

DOCKS

Loading dock challenges are rarely small—a misaligned leveler or failing restraint can halt your operation entirely. RSC offers a complete range of dock equipment to create a safe, efficient space between your facility and every truck that pulls up to it.

Dock Levelers

Bridge the gap between trailers and your dock for reliable loading and unloading. Choose from hydraulic, air-powered or mechanical options to fit your operation.

Dock Seals & Shelters

Create a weatherproof barrier around trailers, protecting your operation from rain, snow, wind and extreme temperatures. Options include dock seals, rain shields and full shelters.

Vehicle Restraints

Keep trailers secure and safely in place during loading and unloading. Choose from automatic, manual, electric or hydraulic options with different locking mechanisms.

Dock Lifts & Ramps

Provide a reliable loading platform for trucks and trailers. Ideal for facilities with limited dock space or specific load requirements.

Dock Accessories

Enhance your dock's functionality and safety with a wide range of accessories, from safety bollards and railings to LED lighting and ventilation fans.

DOORS

Your dock doors work hard—and when they're slow, inefficient or poorly sealed, your operation pays for it. RSC offers a full range of commercial doors built for the demands of industrial environments, from high-speed options that keep traffic moving to heavy-duty doors engineered for longevity.

Commercial Doors

Sectional doors for security and insulation. High-speed doors for efficiency. Rolling steel doors for durability. Fire-rated doors for safety compliance.

Specialty Doors

From pest control to cold storage applications, we offer specialty door options designed to address the specific demands of your environment.

Door Accessories

Enhance the function and safety of your commercial doors with a wide range of accessories, from control panels to seals.

SPECIALIZED DOORS FOR CLEANROOMS & FOOD SAFETY ENVIRONMENTS

Standard doors aren't always enough. Facilities subject to strict FDA compliance require specialized door solutions—ones that minimize contamination risk with easy-clean surfaces, tight seals and materials suited for regulated environments. RSC's specialty door options meet these standards and are well-suited for food processing, pharmaceutical and other sensitive applications.

SERVICES

KEEP YOUR DOCKS MOVING

Unplanned downtime doesn't just slow your operation—it costs you. RSC's comprehensive dock and door services are designed to keep your equipment in peak condition, address issues before they escalate, and get you back up and running fast when the unexpected happens.

Preventative Maintenance

Identify minor issues before they become major problems with scheduled maintenance plans. We inspect, lubricate, clean and adjust your doors and dock equipment based on your specific usage and volume.

Repair Services

Our experienced technicians handle repairs for all dock and door equipment. We offer both 24/7 emergency response and scheduled repairs to minimize downtime and keep your facility operational.

Installation

Whether it's a new door, a dock leveler or a full dock pit construction project, our technicians install equipment correctly and to safety regulations. They manage the project through to completion.

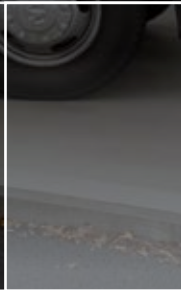

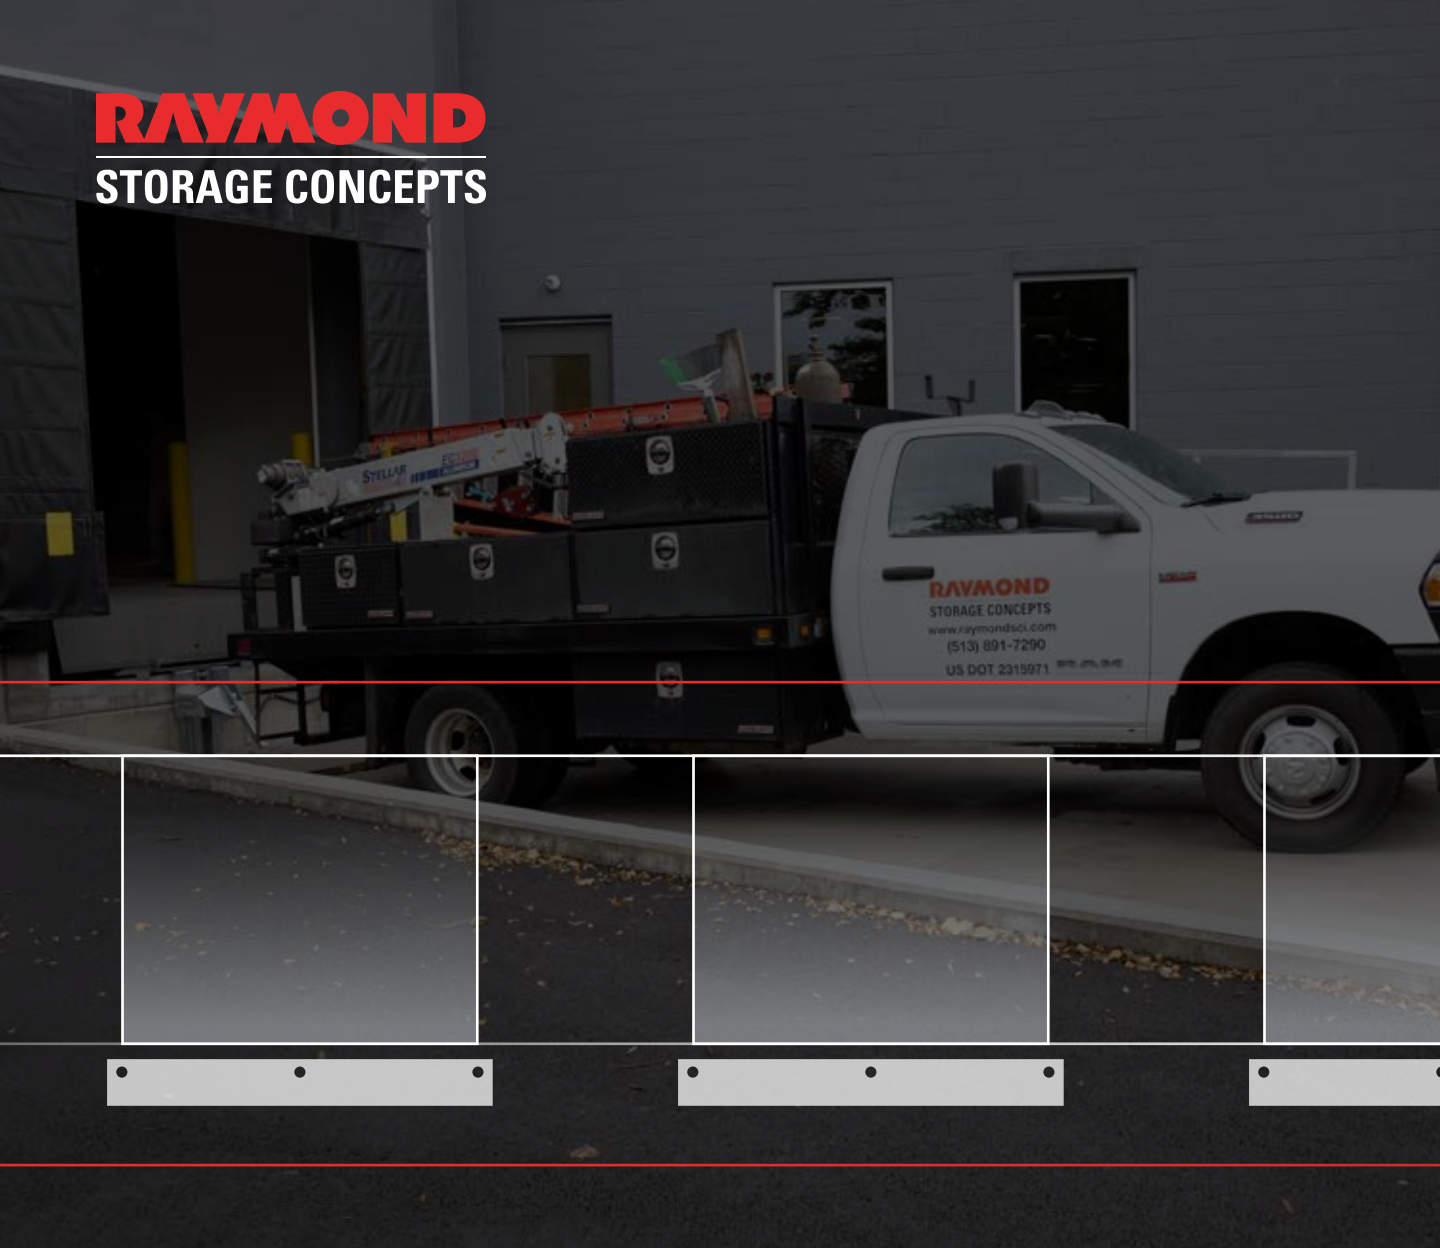

Parts

We source from multiple manufacturers and stock our technicians' vans with the parts most commonly used, so you're not waiting on a shipment to get back to work.

RAYMOND

STORAGE CONCEPTS

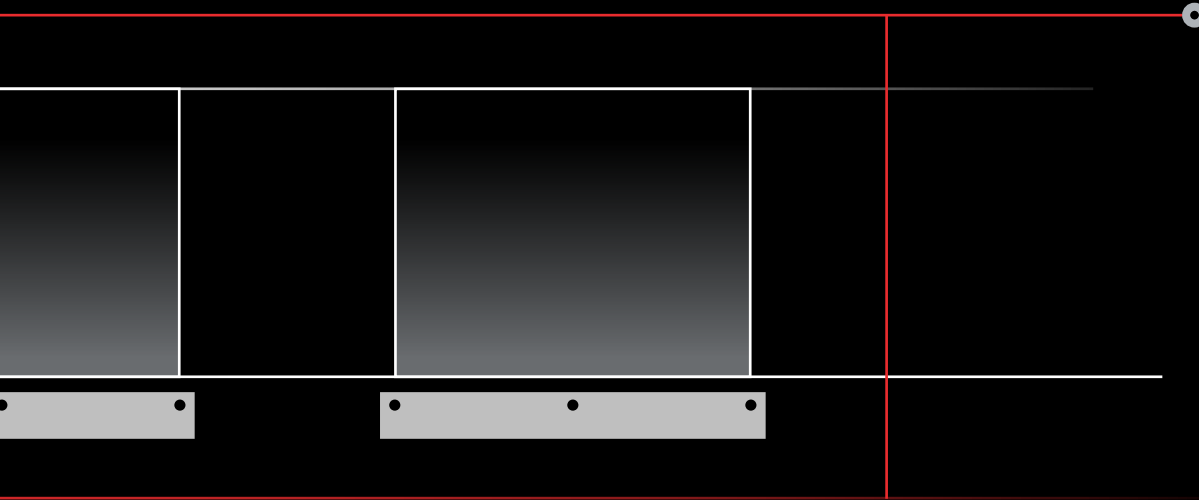

YOUR DOCK, FULLY SUPPORTED

RSC is more than a product supplier—we're your operational partner from product in to product out. Whether you need a single leveler replaced or a full dock area redesigned, we bring the expertise, the equipment and the service to make it happen.

Talk to an RSC specialist about what your dock needs today.
