Automated Storage and Retrieval Systems

**kardex**remstar  
authorized distributor

An efficient storage and retrieval system for your MRO (maintenance, repair and operations) parts can help reduce downtime, improve access control and save floor space.

STORAGE CONCEPTS

## Save Floor Space

Kardex Remstar offers high density storage in a small footprint. We can reduce your required floor space by up to 85%.

## Improve Access Control

Utilizing PIN codes or employee badges, you decide who has access to the machine as well as each individual tray. Decrease parts costs by increasing accountability.

## Reduce Downtime

Kardex Remstar works according to the "goods to person" principle. The Shuttle XP optimizes the storage function to minimize run time thus increasing order picking speed. Frequently used parts can be stored close to the operator interface for maximum accessibility.
